FREE WORKSHOP

Build AI-Powered Applications with Anti Gravity
& MCP

Join us for a hands-on workshop where you'll learn how to build a complete AI-powered application using Anti Gravity and create intelligent chatbot agents using MCP (Model Context Protocol).

SESSIONS

Introduction to Generative AI & Agentic AI

Building a Full-Stack Application with Anti Gravity

Creating an AI Chatbot Agent using MCP

Q&A and Career Guidance

SESSION 1: INTRODUCTION TO GENERATIVE AI & AGENTIC AI (20 MINUTES)

Topics Covered

- What is Generative AI?
- Evolution from AI → LLMs → AI Agents
- Understanding Agentic AI
- Real-world business use cases
- Future opportunities for Developers and Students
- Introduction to MCP (Model Context Protocol)

Learning Outcome

Participants will understand the fundamentals of modern AI systems and how intelligent agents are transforming software development.

SESSION 2: BUILDING A FULL-STACK APPLICATION WITH ANTI GRAVITY (45 MINUTES)

Topics Covered

- Introduction to Anti Gravity Platform
- Application Architecture Overview
- Creating Frontend Components
- Designing Backend Services
- Building and Testing APIs
- Creating Minimum 10 APIs
- Connecting Frontend with Backend
- Application Deployment Walkthrough

Hands-on Demonstration

Build a complete working application from scratch.

Learning Outcome

Participants will learn how to rapidly develop and deploy full-stack applications using Anti Gravity.

SESSION 3: CREATING AN AI CHATBOT AGENT USING MCP (35 MINUTES)

Topics Covered

- What is MCP?
- Understanding APIs as Tools
- Connecting MCP with Application APIs
- Building an Intelligent Chatbot Agent
- Context Management
- Tool Calling & Function Execution
- Querying Application Data through Natural Language

Live Demo

Ask business questions about the application and receive intelligent AI-generated responses.

Learning Outcome

Participants will learn how to create AI agents capable of interacting with enterprise applications using APIs as tools.

SESSION 4: Q&A AND CAREER GUIDANCE (20 MINUTES)

Discussion Topics

- AI Development Roadmap
- Agentic AI Career Opportunities
- Building AI Projects for Portfolio
- Industry Best Practices
- Open Q&A Session

Who Should Attend?

- Students
- Software Developers
- Full-Stack Engineers
- AI Enthusiasts
- Tech Professionals
- Anyone interested in Generative AI and Agentic AI

What You Will Learn

- Build a full-stack application using Anti Gravity
- Create and consume 10+ APIs
- Develop an AI chatbot agent using MCP
- Use APIs as AI tools
- Understand Generative AI, Agents and Agentic AI
- Learn practical AI application development techniques

Prerequisites

- Basic programming knowledge
- Laptop/Desktop with internet connection
- Curiosity to learn AI and modern application development
